

SAFETY CAPS & MESH CHAIRS

ROUND SAFETY CAPS

A plastic cap is used in conjunction with reo bars and star picket posts to expose danger areas on the construction fields, for the safety and protection of persons and machinery. Please be aware that this product is not designed to save impacts or impalements, but may reduce the seriousness of injuries if or when they occur.

- 60 x 65mm
- 100 per pack
- Other colours available upon request.

CODE: 10079

MESH CHAIRS

Panel chairs are used in the precast panel industry for holding mesh and some reo-bars at a required height prior to concreting.

The four small points at the bottom of each chair reduces the unsightly exposure of plastic when the panel is erected.

Code	Description	Pack Qty
10053	Mesh Chair 50mm x 60mm	100
10054	Mesh Chair 65mm x 75mm	100
