

TRIGGER LOCK GROOVE-JOINT PLIERS

Crafted from durable Chrome Vanadium steel, these multi-grip pliers are designed to handle a variety of tasks with ease. The trigger lock mechanism allows for quick adjustment and secure locking of the jaws, ensuring a firm grip on different materials and objects.

Whether you're working on any type of maintenance, in either a workshop or in an industrial setting, these pliers provide reliability and versatility.

Whether you're tightening bolts, shaping wires, or handling intricate repairs, the Trigger Lock Groove-joint Pliers provide the reliability and versatility needed to get the job done efficiently. Invest in a tool that combines durability with ergonomic design for enhanced performance and comfort.

Key Features

- **Chrome Vanadium Steel:** Ensures strength and durability, suitable for heavy-duty use. Capable of withstanding rugged conditions, with long-lasting performance.
- **Trigger Lock Mechanism:** Facilitates easy adjustment and secure locking of the jaws, enhancing operational efficiency.
- **Secure Grip:** Ensures a firm hold on materials, minimizing slippage and enhancing safety.
- **Push Lock Jaws:** Enables rapid gripping and release of objects, ideal for fast-paced tasks.
- **Non-Slip Handle Design:** Ergonomically designed handles reduce fatigue during prolonged use, promoting comfort and precision, allowing for extended periods of comfortable use.
- **Versatile Application:** Suitable for various tasks including gripping, bending, twisting, and holding objects of different shapes and sizes.
- **Multi-functional:** Versatile enough to be used across different industries and applications.

Available In Three Sizes
