

PANEL SHIMS - HALF SHIMS

Designed for the levelling and packing of objects with high load mass. As it's name says, these shims are half the size of the panel shims.

Ideally suited for, but not limited to, the precast panel industry.

Each shim is colour coded to match its bigger brother for thickness identity and also contains ribbing on the faces for non-slippage.

Also made from high quality materials, proven and tested in its field.

SIZE RANGE

Size is 75 x 100mm available in the following thicknesses:

- 1.0mm, 2.0mm, 3.0mm, 5.0mm, 10.0mm, 15.0mm, 20.0mm
- Meets Australian Standard AS 3850.1-2015

Code	Description	Pack Qty
